1 Welcome & What This Is

BASICS

City Tiles POS is the shop's billing system. It runs on a Windows computer and is used to:

- Ring up sales and print receipts on the 80 mm thermal printer.
- Take payments — cash, bank transfer, or on credit (customer account).
- Keep track of customers, products, and daily reports.
- Handle returns and record partial payments.

GOOD TO KNOW

You do not need to be “technical” to use this. Follow the steps in order and you'll be fine. When in doubt, ask your manager.

2 First-Time Setup (on a new computer)

INSTALL

- 1 Run the installer your manager gave you — **City Tiles POS_1.0.0_x64-setup.exe** (or the **.msi** file).
- 2 Windows may show “Windows protected your PC.” This is normal for our installer. Click **More info** → **Run anyway**.
- 3 Follow the prompts. The app opens when finished. **Needs internet once** on first launch to set up the browser engine; after that it works fully offline.
- 4 Sign in with the account your manager created for you.

HEADS-UP

The “Windows protected your PC” message is **NOT**

a virus warning about our software — it simply means the app is not from a big commercial publisher. “Run anyway” is safe.

3 Signing In

DAILY

- 1 Open **City Tiles POS** from the desktop shortcut or Start menu.
- 2 Type your **email** and **password**, then click **Sign in**.
- 3 **Admins** land on the dashboard. **Cashiers** go straight to the sales screen.
- 4 Very first use of a brand-new system: the **owner** creates the first admin account (email + password). After that, staff are added by the admin.

FORGOT YOUR PASSWORD?

Ask your admin to reset it — they use the Cashiers page → reset password. There is no self-service reset, by design.

4 Making a Sale (your everyday job)

CORE

- 1 On the **POS** screen, find the product by searching its name or tapping it in the list.
- 2 Tap a product to add it to the cart. Use + / – to change the quantity.
- 3 If the customer has a deal, enter a **Discount** amount in rupees (Rs.).
- 4 Choose how they pay: **Cash** **Bank** **Credit** .
- 5 If you pick **Credit**, select the **customer** so the amount is billed to their account.
- 6 Click **Complete Sale**.
- 7 The receipt prints on the 80 mm thermal printer — hand it to the customer.

PAYMENT METHODS, SIMPLY

CASH

= paid now in cash.

BANK

= paid now by card/bank transfer.

CREDIT

= customer pays later (their account is billed).

5 Customer Accounts & Credit Sales

CREDIT

- Credit sales are recorded against a **customer**, not against cash in hand.
- **Always** make sure the correct customer is selected before completing a credit sale.
- Customers and their outstanding balances are managed under **Customers** (admin) and tracked in **Invoices**.

6 Recording Payments & Part Payments

INVOICES

- 1 Open **Invoices** to see all sales.
- 2 Open an unpaid or credit invoice → **Record payment**.
- 3 Enter the amount received and save. You can pay part now and the rest later.
- 4 When a payment fully clears, click **Payment cleared** so the record stays tidy.

7 Returns & Refunds

RETURNS

- 1 Open **Returns** from the menu.
- 2 Find the original sale/invoice and process the return.
- 3 The system handles the refund or credit automatically.
- 4 Unsure about the refund amount? Ask a manager before confirming.

8 End of Day — Reports

ADMIN

- 1 Admins: open **Reports** to see the day's sales.
- 2 Click **Export** to save a spreadsheet (CSV) for accounting/records.
- 3 The report lists: invoice number, date, customer, payment method, subtotal, discount, total, and amount paid.

9 Inventory & Customers

ADMIN

INVENTORY

Add or edit products and keep stock counts up to date so the POS shows what's available.

CUSTOMERS

Add customer accounts and review balances — important for credit sales.

10 Managing Staff

ADMIN

Use the **Cashiers** page to: approve new cashier accounts, suspend a cashier, or **reset a cashier's password**.

11 Backups & Your Data

SAFETY

- All data lives on this computer in the **CityTiles** data folder — the system keeps automatic backups.
- **Do not delete** that folder.
- Admins can export data as an extra safety copy; keep the export somewhere safe.

12 Troubleshooting

HELP

Problem	What to do
"Windows protected your PC"	That's SmartScreen. Click More info → Run anyway . Safe to proceed.
App won't open after install	Restart the computer. Make sure you allowed the install, and that it finished. Try opening from the Start menu.
Printer is blank / nothing prints	Check the 80 mm roll is loaded and not jammed, the printer is powered and connected (USB), and it is set as the default thermal printer.
Forgot password	Ask your admin to reset it (Cashiers page → reset password).
Screen frozen / not responding	Close and reopen the app. If it happens often, tell your admin.
"No internet" message	Only the very first launch needs internet once. After that it works offline.

13 Good Habits

TIPS

- Always check the **customer name** on credit sales before completing.
- Double-check the **discount** before you hit Complete Sale.
- **Log out** at the end of your shift.
- Don't switch off the computer while a receipt is printing.

14 Need More Help?

SUPPORT

First contact	Your store manager or owner.
Technical support	AUZ Tech — provided setup & installer.
Tip	Note the date/time and what you were doing when something went wrong — it helps us fix it fast.
